[Consequences of pathological gambling on the gambler and his spouse](#)

Ferland, F., Fournier, P., Ladouceur, R., Brochu, P., Bouchard M., & Pâquet, L. (2008).

The consequences of pathological gambling negatively impact many aspects of the life of both the gambler and his relatives. This exploratory study compared the gambler's perceptions of the consequences of gambling in his life and in the life of his spouse with the perceptions that his spouse had of the same consequences. Seven couples, each including a male pathological gambler, participated in the study. Members of each couple individually completed the questionnaire. The descriptive analyses showed that each member of the couple mentioned, in addition to the financial consequences, different consequences stemming from the gambling behaviour of the gambler. The analyses revealed that the spouse perceived the consequences she experienced, as well as those experienced by the gambler, as more severe than the gambler perceived them. This paper discusses how each member of a couple that includes a pathological gambler differs in their perception of harm related to gambling.
